

Cascades View

Cascades Walk

Spring Gully Conservation Park conserves important habitat for wildlife and unique vegetation which was once commonly found within the largely cleared and settled Clare district. The park includes some of the most picturesque native landscapes in the region, rocky sandstone outcrops, natural springs and steep sided valleys.

The Cascades Walk is a short moderate 1.3 km return walk and is the most popular bushwalk in the park, starting from Blue Gum Lookout where you get sweeping views from Gulf St Vincent to the Cascades which run after sustained rains. Blue Gum Lookout also provides a great place to enjoy a picnic lunch on the tables available.
