

## Background Info

Monto Art Trail is a mixture of diverse art mediums from murals, sculptures, metal, stone, fibreglass and more, that have evolved over a number of years.

Many of the art works have been created by local residents or renowned artists commissioned through local community groups. Recent art installations, in 2020, can be found throughout Monto and surrounding communities.

This map has been provided by Monto Magic Tourism Action Group, whom were instrumental in bringing together the Art Trail and the newest murals, including the grain silo mural, Newton Street artway murals and water tower mural.

Monto Magic is an active group of community members who work hard to ensure that locals, and visitors alike, enjoy spending their time in our magical community.
