

Manton Dam Recreation Area

Manton Dam is a great spot to escape the heat and relax by the water. Hugely popular for watersports, the Dam is often a hive of activity.

Built in 1942, Manton Dam was Darwin's first reliable water supply. Today, although its water is still used in emergencies, it is a popular, recreation area. Its relatively undisturbed drainage area is also a valuable catchment and conservation area.

This area is important to Aboriginal people from a number of language groups: Larrakia, Limilngan, Wulna, Waray and Koongurrukun.

Access (see map)

Turn west off the Stuart Highway about 70 km south of Darwin, all roads are sealed and accessible throughout the year.

When to Visit

The Recreation Area is open from sunrise to sunset everyday, including public holidays. A permit is required for overnight activities.

What to See and Do

Manton Dam is a pleasant destination for an easy day trip from Darwin.

Picnicking - picnic and barbecue facilities are situated amongst lawns and large shady trees.

Fishing - fishing is permitted in the Dam. In the early 1990's, the Department of Primary Industry and Fisheries released about 100,000 farm-bred fingerlings into Manton Dam.

Boating - power boats and water skiing are popular at the Dam. Zones have been set aside for these activities. There is a separate zone for Low Speed Boating (see map). Please ensure you read the bylaws displayed at the boat ramp and ski beach.

Canoeing and Windsurfing - are also catered for in the Low Speed Boating Zone.

All craft must carry required safety equipment.

History

The Manton River was impounded in 1942 to build the Dam which was Darwin's first water supply reservoir. In 1951 its catchment was declared as Woolnough Water Catchment and Flora and Fauna Reserve. In 1972 a dam was constructed on the Darwin River, to the north-west, which then became the main water supply for Darwin's expanding population.

Manton Dam was opened for recreation in 1989. Some areas of the Dam are closed to protect water quality.

Access to the Dam wall and pumping sheds is about 5 km north along the Stuart Highway.
