

# Fogg Dam Conservation Reserve

## Fact Sheet

The scenery at Fogg Dam Conservation Reserve is impressive year-round. As wetlands across the Top End recede, the dam becomes a birdwatchers delight. A dry season sunrise or sunset is spectacular here.

This Reserve is a haven for wildlife amongst Darwin's developing rural fringe. Part of the Adelaide River catchment, it is one of several connected catchments that make up the Top End wetlands. These wetlands have international significance because of their beauty, natural value and importance to Aboriginal people.

The *Limilngan-Wulna* people speak for the land in Fogg Dam Conservation Reserve and play an important role in its management.

The dam was built in the mid 1950s to provide irrigation for the Humpty Doo Rice Project. The RAAF Airfield Construction squadron built the dam and named it Fogg Dam after the Managing Director, Mr J D Fogg, of Utah Australia Ltd. When the agricultural scheme failed the dam had already become a dry season refuge for wildlife, especially waterbirds. Fogg Dam was declared a Bird Protection District in 1959 and later a Conservation Reserve in 1982.

### Access (see map)

Fogg Dam is located approximately 69 km east of Darwin along the Arnhem Highway. It has all weather access and is open all year.

### When to Visit

Between December and July you may find a greater variety of birds – some quite easy to photograph

among lilies and other water plants which flower at this time of year.

### What to See and Do

#### Woodlands to Waterlily

**Walk** - leads you through forests that fringe the floodplains. A boardwalk takes you on to the Dam. There are signs and lookouts along the way.

Length: 2.2 km return

Time: 45 minutes

Grade: 2 - easy

#### Monsoon Forest Walk -

winds through a variety of habitats, including monsoon and paperbark forests, and then onto the floodplains. There are signs along the way.

Length: 2 km return

Time: 45 minutes

Grade: 2 - easy

#### Dam Wall Access - shaded

bird viewing platforms are located along the dam wall. You will need to park your vehicle on the dam wall to access these. Park and access with care.

#### Pandanus Lookout -

wonderful views of the Dam. Great for sunset or sunrise picnics. Parking available.

**Biting Insects** - biting insects are part of the wetland web of life. Warning - mosquitoes can be a problem in the Park around sunrise and sunset. Wear protective clothing and apply insect repellent.

#### No Swimming -

Saltwater Crocodiles inhabit the Reserve. Stay clear of the waters edge. **Be Crocwise.**
